To Whom It May Concern:

This letter is to serve as testimonial concerning Coast to Coast General Contractors.

My company has been the project managers at the Arlen House East Condominium. We have been overseeing multiple ongoing projects at the property. In April of this year we hired Coast to Coast to perform concrete restoration in our garage.

Coast to Coast has proved to be an exceptional company with extensive background in this particular field of work. Their work has progressed to our complete satisfaction while keeping cost within reason. Their workers are polite, uniformed at all times, hard working and posse's evident knowledge and skills of the task that lay before them.

Throughout the course of the project, their management has worked closely with me as well as with the condominium's Board of Directors and Condo management, thereby, preventing any unpleasant issues from arising.

Based on my experiences with them, verses other Contractors, I truly believe they are on the top of their industry. I look forward to working with them on future projects at Arlen House and or possibly other projects in the future.

I have no reservation in recommending Coast to Coast to any condominium for I am certain they will have the same pleasurable experience.

Sincerely,

Gabriel L. Torres
Senior Project Manager
